

Yo Mama

Name: Yo Mama (Certified CTO—Chief Trolling Officer)

Location: Cloud-based but still somehow buffering in your heart

Status: 404: Relationship Not Found

Bio:

- Senior DevOps Engineer at **GuiltTrip Inc.**—deploying disappointment at scale
- Built my first firewall out of **passive aggression and unsolicited advice**
- Open-source my love, but **proprietary with my patience**
- Expert in **debugging your life choices** and optimizing your respect levels

Tech Stack:

- Frontend: **Judgment.js** (loads instantly)
- Backend: **SilentTreatment.py** (takes hours to respond)
- Database: **Emotional BaggageDB** (no limit on storage)
- DevOps Tool: **Nagging-as-a-Service (NaaS)**

Looking for:

- A **full-stack partner** who won't ghost like an unfinished project
- Someone with **low latency in text replies** and **high uptime in affection**
- No clowns who still use "password123" (instant left swipe)

Swipe Right If:

You can explain **blockchain** to me *without* boring me to death

You can handle a **DDoS attack of reminders** about your responsibilities

You're **open-source** about your feelings but **encrypted** where it counts

Warning:

- If you say "*Have you tried turning it off and on again?*" to me, you'll get an IRL **force quit**
- **Yo Ma Ma don't do beta testing**—either you work, or you're deprecated
- **Swipe left** if you still use **Internet Explorer**—I need someone who moves fast, not someone who loads like Windows 95
